

ARCO Zeus A225/3500W-12V ob High Output Outboard Alternator Kit

**Finally you can recharge your batteries
and power your high-draw applications.
Fits your Mercury Verado outboard**

BENEFITS

- Designed high-draw applications such as stabilizers, air conditioners, water/ice makers, trolling motors and more
- Delivers 2 to 3x faster charge times vs OEM units (see graph below for real-world performance)
- Supports high continuous current draw
- Batteries continue charging even at low engine speeds (idle)
- Enables efficient charging without dedicated engine or generator runtime

SPECIFICATIONS

Voltage	12V
Field Type	P
Rotor Poles	16
Weight	14.9 lb (6.7 kg)
Regulation	Internal/ Ex- ternal (IE) and External (EX)
Battery Sense Harness	Included
Alternator Fuse Link	Included
Cut-In Alternator RPM	1,288
Maximum Alt RPM	19,000
Side Mount Battery Post	M8 Thread
Standard Pulley	K6 75 mm
Shaft Diameter	.66 in (17 mm)
Avalanche Diodes	50 amps
Max Output (Cold)	254 amps
Sustained Cruising Output (Hot, 2,000 RPM)	187 amps
Sustained Idle Output (Hot, 1,000 RPM)	157 amps
Max Continuous Operating Temperature	110 degrees C

ARCO PART #	DESCRIPTION
4047	12V A225ob, Verado Mount, Side Mount Battery Post, Internal/ Externally Regulated, Case Ground, 75 mm K6 Pulley - Includes fusible link wire
4048	12V A225ob, Verado Mount, Side Mount Battery Post, Externally Regulated, Case Ground, 75 mm K6 Pulley - Includes fusible link wire

DATA-010 REV-A 5/19/2026 These alternators are advertised under ARCO Marine. These are not made by Mercury or any Mercury affiliation.
