

VALLEY CLEATS

VALLEY CLEATS

This type of cleat is available in several versions for many different applications. Countersunk head screws or bolts of the recommended size should be used. The polyamide cleat is ideal for low load applications whereas the aluminium cleats prevent rope burn under higher load.

Seldén valley cleats are designed and produced by Clamcleat Ltd, UK.

Standard (201) PA

Standard (222) AL

Fairlead (211 Mk1) AL

Fairlead (211 Mk2) AL

Fairlead. End of rope can be fixed under the cleat (270) AL

Rope entry from starboard (217 Mk1) AL

Rope entry from port (218 Mk1) AL

Rope entry from port (218 Mk2) AL

Roller for lines coming from above (236) AL

Roller for lines coming from below (230) AL

Quick lock and release function for trapeze or vang (253) AL

Fine line application in sail, starboard (258) AL

13

Fine line application in sail, port (259) AL

14

Standard (254) AL
